Subject: Microsoft Settlement

Dear Judge,

I do not believe the PFJ is the best solution for the case against Microsoft. I do not understand all the "ins and out" of the case, but I do know that Microsoft has a monopoly on operating systems on computers that needs to be dealt with. As the break up of ATT has given us better systems and more competition, Microsoft also needs to be "broken up" to bring in more competition and thus better products. The PFJ will allow Microsoft to continue as is - this is not right!
Please do what is right for the American people and American businesses!

Respectfully,
Sarah (nickname Sally) Kleinknecht
